

CODE: **GF-GF** v.1.0/1  
 TYPE: **GF-GF double F type socket (professional)**

EN\*\*

**DESCRIPTION**

The GF-GF double F type socket (professional) is used to make connections between two different types of coaxial cables, e.g. RG6, RG59, and RG11, terminated with an "F" type plug. The impedance of the connector is 75 Ohm.

This element, commonly referred to as "barrel", is used in antenna installations (terrestrial, satellite, CATV, etc.). The socket is made of nickel plated brass, which increases its corrosion resistance.

**TECHNICAL DATA**

<b>Code</b>	GF-GF
<b>Connector type</b>	F socket – F socket
<b>Attenuation</b>	0,05dB
<b>Dimensions: (diameter/length)</b>	Φ 7mm / 27 mm
<b>Net / gross weight</b>	0,007kg
<b>Declarations, warranty</b>	CE, one year from the production date
