Touch type function keys panel is dedicated to PRxx1 and PRxx2 controllers (Roger) and operates on RACS CLK/DTA bus. Using the device allows to define four additional function keys in controller with configurable purpose. It is usually used as a T&A mode selector or program-mable touch buttons in building automation. As a part of hotel access control systems HRT82FK is mainly used by hotel guest to call hotel's personnel or to order additional service.

## Features:

- 12 VDC power supply
- four touch type function keys
- communication on RACS CLK/DTA lines
- four LED indicators
- buzzer with loudness control

- tamper contact
- configuration from PC computer (RogerVDM software)
- indoor operation only
- CE mark
